Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 15 - 40 are rejected under 35 U.S.C. 102(e) as being anticipated by USP 6709746 see abstract, cols. 1-4, Table 1 and Table 11.

Applicants' arguments are not persuasive with regard to the above claims in that the claims do not contain the limitations in which applicants are referring in the recent response. Consequently, the claims are not in condition for allowance and are deemed to continue to be anticipated by the prior art of record as currently written.
